BILTON ONE

APPLICATION

//__Wide range of applications for linear lighting in white

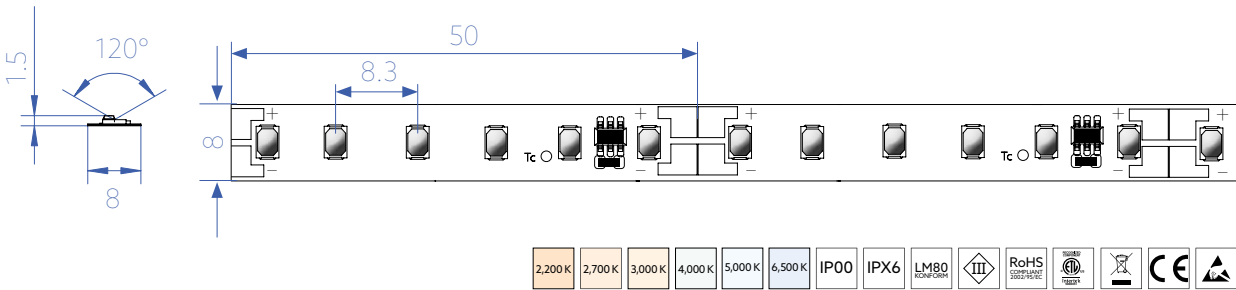

PRODUCT FEATURES

- //__Highly flexible LED light strip
- //__Easy to separate every 5 cm
- //__Constant light properties over the entire length
- //__Also available in higher protection class IPX6
- //__Continuous LED strip (max. 1 solder joint per 5 metres)
- //__Simple installation with double-sided heat conducting adhesive tape
- //__Long service life due to optimised electronic design (L80B10 / 60,000 hrs)
- //__Guaranteed reverse polarity protection
- //__Available also in high luminous fluxes

BILTON ONE >80

The BILTON ONE >80 series is a highly flexible linear LED strip light for general lighting tasks. It stands out with a colour rendering index >80 and a maximum module length of up to 14.5 metres long, linear lighting lines can be implemented. The LED module is connected via a heat conducting adhesive tape. The LED module can be fully controlled with a PWM dimmer (e.g. BILTON LED dimmer). Binning selection based on 3 SDCM (MacAdams) // beam angle 120° // CE, LED RoHS compliant.

Developed and manufactured by BILTON in Austria

BILTONONE available in a 5 or 20-metre packaging unit (PU) in a roll.

BILTON ONE >90

The BILTON ONE >90 series is a highly flexible linear LED strip light with a colour rendering index >90 and can therefore be used for lighting solutions with increased colour rendering requirements. The LED module is connected via a heat conducting adhesive tape. The LED module can be fully controlled with a PWM dimmer (e.g. BILTON LED dimmer). Binning selection based on 3 SDCM (MacAdams) // beam angle 120°// CE, LED RoHS compliant.

Developed and manufactured by BILTON in Austria

BILTONONE available in a 5 or 20-metre packaging unit (PU) in a roll.

* Information about the electrical and lighting technology measurements: Performance data measured after 1 min. at 25 °C ambient temperature and a light colour of 4,000 K. These values can have a tolerance value of +/- 10%. The data can change at any time due to the rapid change in the LED area. The most actual data can be found on the website: www.biltongroup.com
** Module length at 24 V input voltage at the module and luminous flux drop <10% over the specified length.

BILTON AIR

APPLICATION

- //__Individual and customised lighting configurations
- //__Unlimited freedom of design (flexibly deformable and separable)
- //__Object integration
- //__Illuminated advertising and illuminated lettering

PRODUCT FEATURES

- //__Homogeneously illuminated light line with no visible light points
- //__IP67 protection in highly flexible silicone jacket
- //__5 m operating length per feeder possible
- //__Flexible and separable
- //__Specially suited for outside applications
- //__Particularly resistant to UV light, salt mist and atmospheres containing chlorine.

BILTON AIR TOP

The BILTON AIR TOP is a linear LED strip light in a highly flexible silicone jacket. The LED module can be bent in a wave-like manner to the direction of the light emitting surface. The LED module is mounted with the appropriate mounting accessories. The LED module can be fully controlled with a PWM dimmer (e.g. BILTON LED dimmer). Binning selection based on 3 SDCM (MacAdams) // beam angle 120°// CE, LED RoHS compliant. Developed and manufactured by BILTON in Austria

BILTON ECO

PRODUCT FEATURES

//__Price sensitive due to the reduction of LED chips

//__Guaranteed LED properties with guaranteed patent protection from BILTON

//__Guaranteed LED properties

//__Long lifetime (L70B10 / 60,000 hrs.)

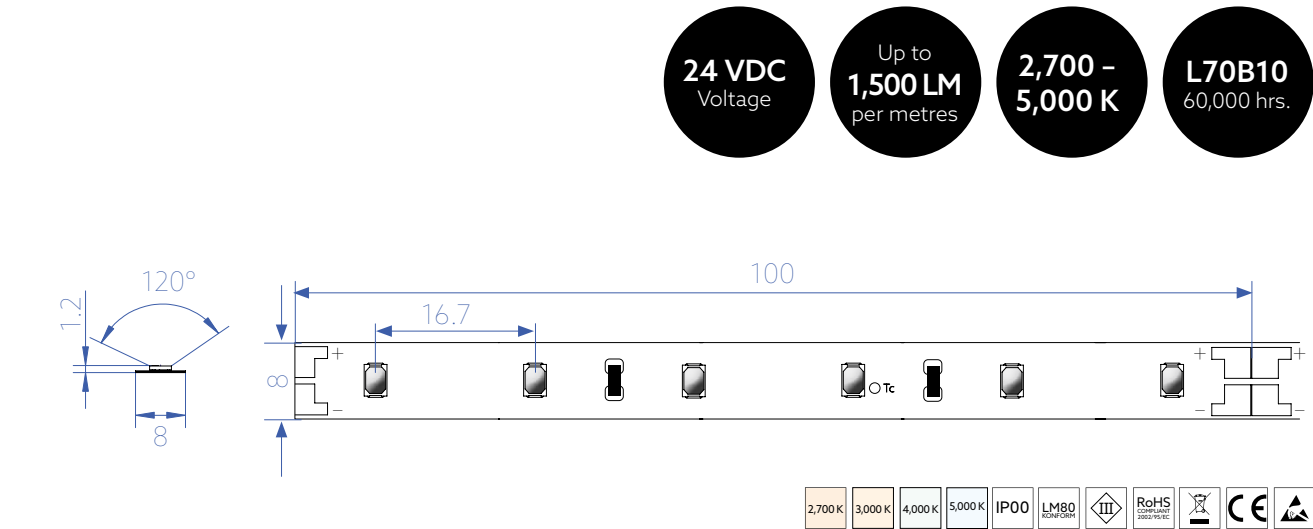

APPLICATION

//__Applications with a focus on the best value for money

BILTON ECO

The BILTON ECO is a flexible linear LED strip light for applications offering excellent value for money. The LED module is connected via a heat conducting adhesive tape. The LED module can be fully controlled with a PWM dimmer (e.g. BILTON LED dimmer). Beam angle 120°// CE, LED RoHS compliant.

Developed by BILTON in Austria

BILTONECO available in a 5 or 20-metre packaging unit (PU) in a roll.

BILTON RGB

PRODUCT FEATURES

//__Mix of 3 colours (RGB pallet)

//__Use of specially configured RGB LEDs with a coordinated colour spectrum

//__Robust structure due to special flex

//__Easy installation without soldering due to plug-in connections

//__Long lifetime (L70B10 / 36,000 hrs.)

APPLICATION

//__Effective lighting scenarios with a strong colour spectrum

//__Applications for status lighting in colour

//__Lighting of events

BILTON RGB PRO

The BILTON RGB PRO is a flexible linear LED strip light for homogeneous coloured light. Also available in protection class IP54. The LED module is connected via a heat conducting adhesive tape. The LED module can be fully controlled with a PWM dimmer (e.g. BILTON LED dimmer). Beam angle 120°// CE, LED RoHS compliant.

Developed by BILTON in Austria

NAME	LUMINOUS FLUX / M*	VOLTAGE	OUTPUT*	EFFICIENCY*	CRI	MODULE LENGTH**	EEC	IP CLASS	RGB

* Information about the electrical and lighting technology measurements: Performance data measured after 1 min. at 25 °C ambient temperature and a light colour of 4,000 K and RGB. These values can have a tolerance value of +/- 15%. The data can change at any time due to the rapid change in the LED area. The most actual data can be found on the website: www.biltongroup.com

** Module length at 24 V input voltage at the module and luminous flux drop <10% over the specified length.

PRODUCT FEATURES

- //__TW = Tunable White = selectable colour temperature in a wide range of white light
- //__Physiologically valuable light (Human Centric Lighting)
- //__Adaptation to the biorhythm using a suitable control system
- //__Long lifetime (L80B10 / 50,000 hrs.)

APPLICATION

/__Can be used for any industry due to its two voltage classes (12 or 24 V)

BILTON ONE TW

The BILTON ONE TW series is a flexible linear LED strip light for a wide spectrum of light. The LED module is connected via a heat conducting adhesive tape. The LED module can be fully controlled with a PWM dimmer (e.g. BILTON LED dimmer). Binning selection based on 3 SDCM (MacAdams) // beam angle 120°// CE, LED RoHS compliant.

Developed by BILTON in Austria

X-LINE CONFIGURATION

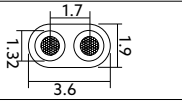

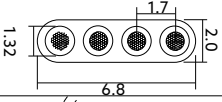

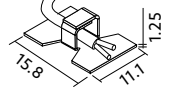

Want to save even more time? And have the luminaire components delivered directly with the right dimensions? No problem! BILTON supplies you with everything you need to install your desired luminaire within 5 minutes. It's that simple: Select a profile and the cover you want. Select a suitable LED module. Please let us know the desired length of the luminaire and the fitting you require: on the cable (M1), supported (M2) or installed (M3). Finally, indicate the desired number of pieces - and that's it.

Profile + Cover + LED module + Length + Installation + Number of lamps

DESCRIPTION	ART. NO.
Prefabrication LED module IP00, made to size, including 20 cm connection cable	169001
Prefabrication LED module IPX6, made to size, including 20 cm connection cable	169002
X-line fabrication profile, LED module (IP00 and IP66-CVD) and cover to size	190000*

* X-line configuration possible up to 2 metres. Special lengths and special designs on request.

ACCESSORIES FOR CONFIGURATION	ART. NO.	
Flexible sheathed cable 2 x 0.5 mm ²	300411	
Flexible sheathed cable 4 x 0.5 mm ²	300412	
Cable holder with adhesive socket	300750	

Enhance your LED module

BILTON X-LINE SMART CORE

PATENTED AND BUNDLED INTELLIGENCE

With BILTON X-LINE SMART CORE, BILTON is launching a range of ultra-modern lighting components, making our configured luminaires of the BILTON X-LINE-range almost unlimitedly smart. With the integrated motion sensor technology and presence detection **MOTION SENSOR**, our products from the X-LINE range come with the ability to communicate autonomously independently with each other. The **SWARM INTELLIGENCE** sensor function can be used to interconnect entire luminaire clusters. Of course, all this is done using the standardised protocol **BLUETOOTH**. And it goes without saying that these patented lighting components have future-proof safety functions such as the **TEMP PROTECTION** overheating protection, which monitors the luminaire in the operating temperature range.

There is also the CO2 sensor **ROOM CLIMATE SENSOR**, which emits optical warning information using the lighting. These electronic lighting components are fully compatible with our BILTON ONE range LED strips in terms of lighting technology and extend the power spectrum of a flexible LED strip with mechanical and electronic properties that were previously unimaginable. Thanks to the strain-relieving end feed, technically induced dark zones are a thing of the past. Likewise, a centre feed into the LED band can be created, so that very long cable lengths can be designed. All in all a smart extension of our BILTON X-LINE range.

TEMP PROTECTION

EASY CONNECTION

JUST A CLICK

Simply connecting LED modules without cumbersome soldering is no problem. 2-pole connectors are suitable for single-colour modules. 4-pole connectors are needed for multicolour designs (RBG, EMOTION). A shrink-hose is available for external applications. The connector can be used for feeds from power packs or for connecting two LED modules. Efficient and intuitive connection on the construction site.

FEEDERS

Feeders are the easy way to connect LED modules to the power supply.

CONNECTOR

Connectors are suitable for connecting LED modules together easily. One click and you secure a safe and reliable transfer of power.

ACCESSORIES LED MODULES

FIVE SIMPLE STEPS

Would you rather build your own LED luminaire yourself? With the right tools and the BILTON product range, you can easily install your desired luminaire in just a few steps. BILTON supplies everything you need, from LED modules to LED accessories, profiles, covers, power supplies and the appropriate controls. Order, put together, install. And if you need help, you can contact BILTON Technical Support.

STEP 1
Adjust profile and cover to the desired length and clear residue from the base. Profile care instructions can be found in the instructions at www.biltongroup.com.

STEP 2
Cut the LED module to the correct size. An LED light band can be quickly connected with the feed connector. Check the max. module length. For IPX6, the IPX coating must be removed from the contact pad before soldering. Note the max. conductor cross-section up to 0.5 mm² Cu. Heat-shrink all cut ends of the shrink hose with a hot-air dryer at 200 °C for approx. 4 – 6 seconds.

STEP 3
Glue the LED module with gentle pressure into the profile. BILTON cable holders are recommended in order to protect against mechanical loads.

STEP 4
Carefully push the cover in and insert the linear lenses. Do not mount endcaps and mounting material until after covering.

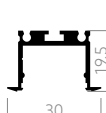

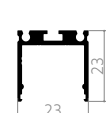

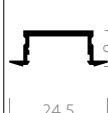

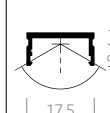

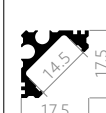

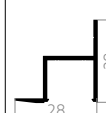

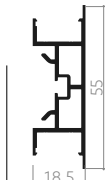

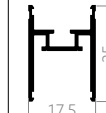

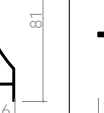

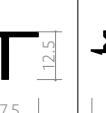

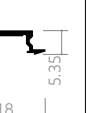

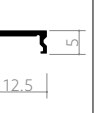

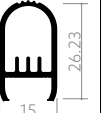

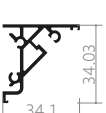

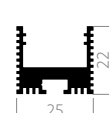

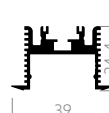

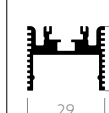

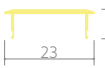

STEP 5
Only use fitted systems from BILTON in order to prevent damage from external power peaks. The maximum connection power (rated voltage) and the maximum operating length must be complied with. Note the polarity as well.

PROFILES AND COVERS

PROFILES AND COVERS

LED lighting solutions from BILTON are based on a well-conceived, complete system: the BILTON kit. It's highly functional, as all parts at BILTON are matched and go together 100% – from the profile to the accompanying covers and lenses, all the way to the desired LED module for optimum light resolution. The appropriate accessories are included, such as endcaps, connection elements and assembly accessories. Innumerable solutions can be combined as a result.

LED DIMMERS

BASIC SERIES

The BASIC series is a 1 to 4-channel LED dimmer for modules in constant current operation. Its small design and high levels of reliability are impressive, and it is ideal in areas with difficult access. An external power supply is required for operation. Automatic device load detection (1, 2, 3 or 4 channels). Distribution of the entire output of max. 10 amps to 1 – 4 channels.

NAME	CONTROL SIGNAL	SUPPLY VOLTAGE	OUTPUT VOLTAGE	OUTPUT RATING	OUTPUT LOAD	NUMBER OF CHANNELS	ART. NO.
KNX Basic	KNX*	12 - 24 VDC	12 - 24 VDC	240 W / 24 V	10 A max.	1 – 4	101645
DALI / SWITCH DIMM Basic	DALI / SWITCH DIMM	12 - 24 VDC	12 - 24 VDC	240 W / 24 V	10 A max.	1 – 4	101639
DMX / ANALOG Basic	DMX / ANALOG	12 - 24 VDC	12 - 24 VDC	240 W / 24 V	10 A max.	1 – 4	101643

REG SERIES

The REG series is a 1 to 4-channel LED dimmer for modules in constant current operation, suitable for top hat rail assembly in the switch or distributor cabinet. Automatic device load detection (1, 2, 3 or 4 channels). At 10 amps, the power is divided across 1-4 channels as required. At between 10 and 14 amps, the load has to be distributed equally. An external power supply is required for commissioning. Triple distribution unit for distributor installation.

NAME	CONTROL SIGNAL	SUPPLY VOLTAGE	OUTPUT VOLTAGE	OUTPUT RATING	OUTPUT LOAD	NUMBER OF CHANNELS	ART. NO.
KNX REG	KNX*	12 - 24 VDC	12 - 24 VDC	336 W / 24 V	4 x 3,5 A	1 – 4	101673
DALI / SWITCH DIMM REG	DALI / SWITCH DIMM	12 - 24 VDC	12 - 24 VDC	336 W / 24 V	4 x 3,5 A	1 – 4	101670
DMX / ANALOG REG	DMX / ANALOG	12 - 24 VDC	12 - 24 VDC	336 W / 24 V	4 x 3,5 A	1 – 4	101672

STEEL DIMMER

The BASIC steel series is a 1 – 4 channel LED dimmer for modules used in constant voltage. It convinces through its form factor but high reliability and is ideal in areas that are difficult to access. Operationally it requires an external power supply,

NAME	CONTROL SIGNAL	SUPPLY VOLTAGE	OUTPUT VOLTAGE	OUTPUT RATING	OUTPUT LOAD	NUMBER OF CHANNELS	ART. NO.
EnOcean Steel	EnOcean	12 - 24 VDC	12 - 24 VDC	up to 200 W / 24 V	4 x 2.2 A max..	1 – 4	101637

SXT SERIES

The SXT series is a 1 to 4 channel LED dimmer for constant voltage-powered LED modules with integrated power supply, output signal PWM (= pulse width modulation) 600 Hz. Automatic device load detection (1, 2, 3 or 4 channels). Distribution of the entire output of max. 4 amps to 1 – 4 channels.

NAME	CONTROL SIGNAL	SUPPLY VOLTAGE	OUTPUT VOLTAGE	OUTPUT RATING	OUTPUT LOAD	NUMBER OF CHANNELS	ART. NO.
KNX SXT	KNX*	230 VAC	24 VDC	100 W / 24 V	4 A max.	1 – 4	101651
DALI SXT	DALI	230 VAC	24 VDC	100 W / 24 V	4 A max.	1 – 4	101647
DMX / ANALOG SXT	DMX / ANALOG	230 VAC	24 VDC	100 W / 24 V	4 A max.	1 – 4	101649

* KNX application and manual in the download area at www.biltongroup.com.

POWER SUPPLIES

Power packs are the connectors to the electricity network and form the basis for the interruption-free operation of linear LED solutions. High-quality power packs guarantee that the best can be obtained from linear LED lighting. BILTON power packs are characterised by very high efficiency, a long lifetime, uninterrupted operation and constant voltage over the lifecycle. Different power classes and designs make it possible to find the optimum LED power pack for the respective application.

DALI LIGHT CONTROL

DALI LIGHT CONTROL GATEWAY

DALI is the traditional light bus standard for the central control the LED light management. Apart from a touchpanel, BILTON now also offers a DALI Light Control App. 64 addresses, 16 groups and 16 different scenes can be controlled using this app directly from an iPhone or iPad. It is also possible to control the blinds. For example, the most important rooms can be illuminated with the quick button "WELCOME" even before entering the house. Of course, DALI buttons can be integrated so that you can also use the familiar switches. Living areas can quickly be given just the appropriate ambience using the freely programmable scenes. The finished program can be exported at any time and imported to another iPhone/iPad. The BILTON LC app can be downloaded from the App Store free of charge. And the best thing is: No separate software is needed, everything can be entered via the iOS device.

CONNECTION

Simple connection of the DALI Gateway through integration into an existing network.

SYSTEM

Full light and blinds management with few components.

CONTROL

Up to max. 64 DALI addresses can be controlled, creation of 16 scenes and 16 groups possible.

PROGRAMMING

Free programming possible directly on iPhone/iPad.

OPERATION

Easy menu controls allow for user-friendly operation.

ADDITIONAL FEATURES

Integration of DALI sensors, buttons and blinds controls realisable.

NAME	CONTROL SIGNAL	IP CLASS	DIMENSIONS (W x H x L) IN MM	ART. NO.
DALI LIGHT CONTROL GATEWAY	DALI	IP20	105 x 85 x 85	101669

WELCOME HOME

When entering or leaving a building, a freely programmable light scene can be called up using the speed buttons "WELCOME" and "GOODBYE". The control menu allows for a free design of the user interface. The position of groups, scenes and individual lights can be specifically determined.

INDIVIDUALLY CONTROLLABLE

The spatial division of light groups can be freely defined. A targeted naming of the individual rooms allows for clear representation and simplifies use. Each DALI bus participant can be named as desired. Apart from the display options, the standard light value can also be set. In addition, the gateway also offers the option for controls for blinds to be integrated into the DALI system.

MULTI-ROOM SETTINGS

The predefined individual lights, scenes and groups can be dimmed or switched in the respective submenu for the individual rooms. The colour setting for RGB and TW lights is performed using the colour selector. Colour changes are also possible directly via the control menu. The database of a fully programmed DALI system can be transferred to another iPhone/iPad easily by means of a simple database export.

CONTROL DEVICE FOR THE DALI LC APP

The DALI Light Control Gateway, as well as touch control, also offers one the possibility to freely programme and control 64 addresses, 16 scenes and 16 groups by iPhone/iPad. Activation takes place directly via iPhone/iPad. A maximum of five iOS devices can be used with one DALI Light Control Gateway. Integration into an existing network or WI-FI is required. The integration of additional components (DALI MC, movement and brightness sensors) and a blinds control is also possible without great effort.

* More information can be found at www.biltongroup.com.

LED
CONTROLLER

BASE CONTROLLER

This light scene controller with a jog wheel is for one light circuit. Two scenes can be stored. The speed of the colour circuit can be regulated. Dimming possible. No software needed. DMX and EnOcean (via radio) available. BILTON DMX or EnOcean LED dimmer required!

Table with 7 columns: NAME, CONTROL SIGNAL, IP CLASS, INPUT VOLTAGE, OPERATING PERFORMANCE, DIMENSIONS (W x H x L) IN MM, ART. NO. Rows include DMX BASE and ENOCEAN BASE.

TWO TW FUNK CONTROLLER

The Tuneable white technology allows for the smooth adjustment of light colours from warm white to cold white. The LED module can, therefore, be adjusted individually to the respective furniture. The set is made of a remote control, including a wall holder and receiver unit (page 11).

Table with 7 columns: NAME, CONTROL SIGNAL, IP CLASS, INPUT VOLTAGE, OPERATING PERFORMANCE, DIMENSIONS (W x H x L) IN MM, ART. NO. Rows include TWO TW FUNK.

DALI POWER SUPPLY

The power supply for the DALI bus system. With an output of 240 mA, up to 64 addressed participants and 20 – 30 control modules can be connected.

Table with 5 columns: NAME, CONTROL SIGNAL, IP CLASS, DIMENSIONS (W x H x L) IN MM, ART. NO. Rows include DALI POWER SUPPLY.

LED light systems are being used more and more. For easy and convenient control and regulation, BILTON offers the suitable control systems in compact and highly functional designs. The controllers are characterised by high energy efficiency, excellent processing and an excellent price-performance ratio. No matter whether KNX, DALI, EnOcean (radio), DMX or analogue – BILTON controllers have been developed and built for high reliability and user friendliness.

DALI CONTROLLER

The DALI controller with, among others, 4 freely programmable switch inputs, can be inserted into the flush-mounted socket, turning it into the DALI switch.

Table with 5 columns: NAME, CONTROL SIGNAL, IP CLASS, DIMENSIONS (W x H x L) IN MM, ART. NO. Rows include DALI CONTROLLER.

DALI TOUCHPANEL

Multifunctional DALI touchpanel for single and multiple channel applications (white or RGBW). Three light circuits can be controlled. Configuration via DALI software.

Table with 5 columns: NAME, CONTROL SIGNAL, IP CLASS, DIMENSIONS (W x H x L) IN MM, ART. NO. Rows include DALI TOUCHPANEL.

INFINITY LED CONTROL

Remote radio control and dimmer for switching, dimming and controlling BILTONCOLOR modules. Scope of delivery includes remote control, including receiver (control). Total output 216 Watt output current max. 3 A per 3 assigned channels.

Table with 5 columns: NAME, CONTROL SIGNAL, IP CLASS, DIMENSIONS (W x H x L) IN MM, ART. NO. Rows include INFINITY.

ENOCEAN RADIO SWITCH

The 80 x 80 mm EnOcean radio switch can be fitted quite easily to the wall. Suitable for single or multichannel applications (white, RGB).

Table with 5 columns: NAME, CONTROL SIGNAL, IP CLASS, DIMENSIONS (W x H x L) IN MM, ART. NO. Rows include RADIO SWITCH.

DALI USB INTERFACE

USB data interface with integrated bus connection. It allows a PC to be connected for addressing, programming and diagnostics of DALI components.

Table with 5 columns: NAME, CONTROL SIGNAL, IP CLASS, DIMENSIONS (W x H x L) IN MM, ART. NO. Rows include DALI USB INTERFACE.
