ETS6 de Cloud license a Dongle license

Interchangeable? DONGLE → CLOUD ✗

ETS6 KNX

1. HOW TO INSTALL THE ETS6 SOFTWARE

For all ETS versions

There is only one ETS6 setup, which installs the 'ETS6 software package' or short 'ETS6' as demo because the ETS6 setup does not add a license automatically.

Make sure that your computer meets the hardware and software requirements before you start the installation.

Then follow these steps:

1. Go to MyKNX and sign in to your account.
2. Click the menu 'Account -->Products'
3. Click an ETS6 product drop-down to be expanded.
4. Click the 'Download Software' link.
5. Locate the downloaded zip file that contains the ETS setup file
6. Extract the content of the downloaded zip file and run the 'Ets6Setup.exe'
7. Follow the steps of the ETS6 installation wizard.

2. HOW TO BUY LICENSE

After buying the ETS6 license of your choice at Futurasmus using your usual payment method and conditions, you will receive from Futurasmus a license number which must be put in your myknx account.

To do so, log into your "myknx account", click "Account" -> "Products" -> "Obtain licenses" and just enter the code. The licence will automatically be added to your account and will appear in your list.

3. HOW TO INSTALL LICENSE

You can proceed in 3 different ways:

CLOUD-BASED LICENSES
1. Install the license using the "Guided licensing, Cloud-based ETS6 licenses" (requires an active internet connection)

DONGLE-BASED LICENSES (dongle shipped directly to you from Futurasmus)
2. Install the license using the "Guided licensing, Dongle-based ETS6 licenses" (requires an active internet connection)

3. Install the license using the "Manual licensing, Dongle-based ETS6 licenses" (does NOT require an active internet connection)
