

# IP-Project Plug-Ins

## 1 Installation

Also extended functions are available for the **Busch-ComfortTouch®** aside from the basic functions. These plug-ins you will find on our homepage. Plug-ins can be installed with IP-Project.

Carry out the following steps:

- Load the plug-in from our homepage to your hard disk
- Start IP-Project with the use of administrator rights
- Call up the "Plug-ins..." entry in the menu under "Tools"
- Press the "Add file" button in the plug-in dialog.
- Navigate to the directory in which you have stored the Plug-in file
- Open the .jar-file
- In window "Add plug-ins" confirm with OK

The new functions will be available after the restart of IP-Project
