- CT (Colour Transition) mode, automatic day colour gradient
- Suitable for operation with DC voltage of emergency lighting systems
- Individual, group or central addressing
- 16 light scenes per DALI system
- Read out DALI device state via KNX, e.g. brightness or luminaire error
- Manual operation of the DALI groups, individual devices or central (broadcast) separately for each DALI system
- Forced guidance of disabling function
- Feedback of switching state and brightness value in bus and manual operation
- Collective feedback
- Central switching and dimming function
- Disabling function for each DALI group or each individual device
- Separate ON and OFF delay
- Staircase lighting timer with switch-off warning
- Online or offline project design of the DALI devices with ETS-DCA
- Standby switch-off of the DALI devices
- Replacement of a single DALI device of the same type, during operation, possible without software
- KNX Data Secure compatible with ETS 5.7.7 or ETS 6.1.0 or higher
- Can be updated with the ETS Service App

As of device version V01 or software version V2.0.8:

- Multi-master capable: DALI-2 sensors can be used as application controllers
- DALI-2 sensors are supported as input devices in instance mode
