EIB / KNX Data Logger

LOG6A-FW

Description

The Data Logger LOG6A-FW is designed to log KNX/EIB telegrams up to 6 different data points.

Referring to the perameterised data point types the number is automatically adapted by the appplication program. Values of 1bit, 1byte, 2byte or 4byte could be logged.

The KNX/EIB module stores all data every 15 minutes for one year and can be read out through a browser by TCP/IP via the KNX/EIB bus.
