

# Installation of heat/ cooling and water meters

## Description

Would you like to have an effective and flawless installation of your meters? Then, your installers must attend this course at Kamstrup Academy. We will be working with everything that your installers need to know in order to perform a proper installation in the easiest possible way. The course participants will have a review of the requirements and special conditions that apply to the installation of heat/cooling and water meters. There will be a thorough introduction to the main meter variants and their functions.
