

# UNIC0coder® MP

Singlejet consumption meter  
with M-Bus interface EN 13757-2  
for warm water up to 90 °C  
DN 15, 20

## Your benefits

- Mechanical roller register with 1-litre-resolution:  
**Efficient consumption monitoring in energy data management**
- Transfer of the effective meter reading:  
**No data loss and guaranteed security of the billing data**
- Register without batteries:  
**No service life restriction**
- Robust, high grade wear resistant materials:  
**Excellent measuring stability and reliability**
- Measurement of low flow rates:  
**Increased cost effectiveness**

## Application

- Residential consumption monitoring of water consumption within an entire building
- Water meter with M-Bus data communication

## Options

- M-Bus peripheral devices
- 1" NPSM connection thread on meter for 130 mm execution

## Features

- Singlejet dry-dial meter with magnetic coupling
- 8 dial resolution with 3 comma place
- Register can be turned for best readout position
- Maximum operating pressure PN 16 bar
- Maximum operating temperature 90 °C
- Horizontal or vertical installation
- High grade wear resistant and corrosion proof materials
- Inlet strainer
- Recyclable execution
- **CE** Conformity according to European Measuring Instruments (MID)
- Serial M-Bus-Interface to EN 13757-2 and M-Bus-Protocol EN 13757-3
- Power is provided from the M-Bus central
- Connecting cable, standard length 1,5 m

## GWFcoder®-Technology

### The 2<sup>nd</sup> generation

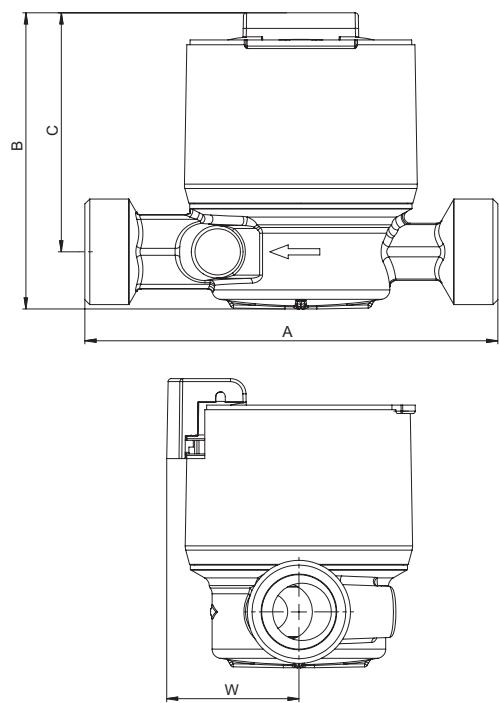

The well-established GWFcoder®-system reads the absolute mechanical register value precisely and reliably and provides the data through standardized interfaces. The number wheels with three various long, asymmetrically arranged slots are being scanned through light pipes which are connected to five light emitting diodes (LED). Thus, the exact position of each number wheel can be detected and the encoded absolute register read can be transmitted as part of the M-Bus protocol. This functioning principle is patented by GWF. The GWFcoder®-interface provides an incomparably higher level of information compared to meters with pulse output.

GWF enhanced the reliable technology in its 2<sup>nd</sup> generation, so that 8 instead of 5 number wheels are being scanned and therefore a resolution of 1 liter is possible.

## Installation

|             |            |   |
|-------------|------------|---|
| Pipeline:   | horizontal | — |
|             | vertical   |   |
| Meter head: | upwards    | ↑ |
|             | sideways   | ↔ |
