1 Push-button pair

The INSTABUS 1-gang push-button is a command device for e.g. switching, dimming and blind control functions according to the "application software" loaded into the flush-mounted insert.

The push-button pair 1 consists of two horizontally adjacent push-buttons. When one of two push-buttons is pressed, a data telegram for ON, BRIGHTER, UP etc. is sent while a data telegram for OFF, DARKER, DOWN etc. is sent when the other push-button is pressed.

The green circles A around the push-buttons indicate that the push-button is ready for operation. They can also be used as an orientation light.

The red circle B around the left push-button is a programmable status display.

2. Installation

The push-button is an application module in the System Design range and is clipped onto:

- Bus coupler, flush-mounted (art. no. 690099)
- Switch actuator, flush-mounted/230/10 (art. no. 627099)
- Series actuator, flush-mounted/230/6 (art. no. 627199)
- Blind actuator, flush-mounted/230/6 (art. no. 627299)

The push-button must also be completed with a System Design frame.
