

Product details

BINARY INPUT 2-F GESIS KNX TA 2/2

The gesis KNX 2-fold pushbutton interface is a binary input/output device for flush-mounting. It can be installed together with conventional pushbuttons/switches in mounting boxes. This way all switching programs can be integrated into KNX systems. The inputs can be configured as outputs for LEDs.

Basic information

Article number	83.020.1404.0
EAN	4049088007781
Unit of measure	Piece
Packaging Quantity	1

Classification

Wieland Product Families	Push button interface - gesis KNX
Technical Classification	Binary input for bus system

General Data

Bus system EIB/KNX	Yes
Bus system LON	No
Bus system radio frequent	No
Bus connection included	Yes
Mounting method	Flush mounted (plaster)
Connection type	Plug-in connection
Degree of protection (IP)	IP20
Colour	Grey
RAL-number (akin)	7035
Modular expandability	Yes

Feed In

Operating voltage	
Voltage type	
Bus input	KNX TP1
Additional power supply	No

Product details

Input

Number of inputs	2
Min. input voltage	
Max. Voltage	
Generates signal voltage	Yes

Dimensions

Width	37 mm
Height	37 mm
Depth	10 mm
Width in number of modular spacings
