NO COMPROMISES

Sharp-edged, rectangular and high-gloss, straight line balance, discarding all other design attributes, these are the outstanding design features of the new Berker K.1 surface range. This new interpretation of a timeless design is Berker's response to those many clients and architects who desire to give rooms that timelessly uncluttered, linear character.

Available surfaces: polar white, white

TIMELESS TRANSPARENCY

Available surfaces: glass/polar white, glass/aluminium, glass/anthracite

The classic form of the B. Series, combined with elegant glass with Berker B.7 Glas will lend your living spaces a very special appeal. Its pure design combines perfectly with the most diverse furnishing styles. Depend on a clear view.

EASY BRILLIANCE

Available surfaces: aluminium/anthracite, aluminium/polar white, gold metal/polar white

Key features of Berker B.3 in genuine aluminium are the gentle shimmer of the metal and the simple, elegant form. Its lustre will bestow a timeless appeal on your rooms.

INDIVIDUALITY IN COLOUR

With the clever symbiosis of shape and colour of Berker B.1 you can put the finishing touch to even the most unusual interior designs. The variety of colours and the high-tech features are perfectly attuned to your needs.

Whether you choose B.7 with glass, B.3 with real aluminium, or the international prize-winning design of the S.1: you can enjoy all the state-of-the-art features in every range. And should you want to change your room around at a later date, you can simply swap your existing design for one of the other the surface designs in the series.

THE NEW STANDARD

Design  
Award  
Winner  
2000

Simple, timeless, functional – the simple form of the Berker S.1 is what makes the new standard range a modern classic. And this excellent quality is precisely the reason why it was given the iF-Award 2000 and the Good Design Award 2001. Lets you live the prize-winning lifestyle.

UNCOMPROMISING PROGRAMME DEPTH

Available surfaces: polar white, white

The Berker Modul 2 standard range offers you an ideal combination of tried and tested design and optimum cost-of-ownership ratio. A range for simple tastes, but without compromise when it comes to quality and programme depth.

## BAUHAUS STYLE

Modern classicism in the functional Bauhaus style of the Berker Serie 1930 exudes an air of the extraordinary. The timelessly classic facade conceals state-of-the-art technology. A perfect combination for those who value something out of the ordinary.

Available surfaces: polar white, black

## AESTHETICISM AND TRANSPARENCY

Available surfaces: glass, glass/polar white, glass/black – in combination with polar white, black or chrome toggle

Simple and elegant the Berker Glasserie unites design and materials in a stunning combination. Bauhaus aesthetics and the transparency of real glass are the perfect answer to your desire for stylish interiors as much so in renovated buildings as in modern new builds.

ELEGANT CHARACTER

If you like something a little bit more extravagant, then Berker Palazzo is the right range for you. With its marble or mahogany effect surface and the 24 carat gold plated decorative rings, the switch is a work of art in itself and meets all the requirements of an exclusive ambience.

Available surfaces decors: white decor marble, black decor marble, brown decor root-wood

ELEGANT DIVERSITY

The beautiful interplay of design, material and function of the Berker Arsys will satisfy the most demanding of clients. The elegant design, timelessly appealing colours and materials such as stainless steel offer a tremendous wealth of variety. And for an extra special accent, Berker offers you Arsys gold for a touch of luxury.

Available surfaces: stainless steel, polar white, white, brown, gold metal, light bronze metal, basic colours are inter-matching

GREAT FORM, GREAT COLOUR

With Berker Twinpoint you can restate the tone and atmosphere in your living space again and again. The interchangeable decorative rings in a wide variety of colours allow you to personalise your interior down to the last detail.

Available surfaces: polar white, red, black, Corian® sierra grey/polar white, Corian® sierra black/black, basic colours are inter-matching and can be combined with coloured decorative rings

ELEGANT APPEAL OF ANOTHER SORT

The TS switch series not only has an unusual design. This range also lets you take advantage of the Berker instabus EIB und Berker radio bus intelligent building management systems. In addition, the choice of colours and materials give full rein to your creative interior design flair.

Available surfaces: clear glass, gold (24 K plated), stainless steel matt, frames with decorative plates in a range of material and colour combinations

## A HOUSE THAT THINKS FOR ITSELF

Berker instabus EIB is an intelligent system which interconnects your electrical appliances via a trip line. This allows you to control several different appliances simultaneously. With just one control display or a small number of switches you can control the lights, the heating, the window shutters or the alarm system. If you prefer, you can even call up functions or status from your PC or Palm.

You can even teach your house to look after itself in specific areas. It can detect good or bad weather using sensors, and close the shutters automatically if necessary. That means that even when you are not at home, you can be sure your house is looking after itself.

### **BERKER COMFORT**

Use the info display to operate and monitor the entire system in a user-friendly way. From one place with just a few presses of the button. A clear, easy to navigate menu, of course.

### **BERKER CLIMATE**

Heating systems are more effective if they are connected to contacts on doors or windows. They will then know when windows or doors are open and adjust the heating accordingly.

### **BERKER RESOURCE CONSERVATION**

With the intelligent coupling of thermostats, sensors and actuators your house automatically responds to any weather. It controls the heating precisely according to requirements, saving you time and money. This also conserves environmental resources.

### BERKER AMBIENCE

Every mood has the right lighting situation. Simply store your ideal combinations for eating, working and watching TV and then call up your light scenarios with the press of a button.

### BERKER SIMPLICITY

Clear and easy-to-understand: the info display is just one of the ways in which we have made controlling your home as simple as possible. You can then concentrate on the important things in life.

### BERKER SECURITY

You can switch on the lights all around the house at the press of a button. If you hear a noise at night, for example. Good for your security, bad for uninvited guests.

MAKING INTELLIGENT HOMES SIMPLE TO USE

Berker B.IQ in brushed stainless steel

Available surfaces: brushed stainless steel, glass, plastic in polar white

The Berker B.IQ makes it even easier to operate your intelligent home. Up to four instabus EIB function controls can be combined into one control unit: thermostat, info display, push-button and time clock. Light scenarios and other applications can be easily set to your requirements without software so simple, anyone can do it. Added intelligent details include the transparent label strips which can simply be removed after the user has become acquainted with the system. Plus the LEDs on the side of the unit that indicate currently active functions. And the display that communicates with you in clear text.

Digital telegrams are distributed throughout the house via radio.

## CORDLESS COMFORT

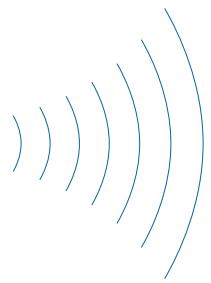

The Berker radio bus system is the ideal way to update your electrical installation without having to replaster the walls. The Berker Radio Bus system fits in anywhere.

With just a few components you can equip your house, apartment or office to make your life more comfortable and secure. And you can begin immediately, because the Radio Bus system needs no additional electric wiring. Lights, household appliances, electric shutters and awnings, the heating, your alarm system and many more systems are activated by radio signals. All you need to do is press a button on the hand-held or wall-mounted transmitter and a radio signal will transmit your request to one or more receivers around the house.

The small flat wall transmitters are battery operated like the hand-held transmitter and easily attach anywhere, even onto glass surfaces. The receivers are available in the same way as normal light switches and dimmers as wall inserts, as corded dimmers freestanding lamps or as radio adapter plugs for the socket outlet. As built-in receivers they can be concealed just about anywhere, and with suspended ceilings can be connected directly to an appliance or light source. It is also easy to take the radio bus with you if you move house. For more information, please ask for the special brochure.

## COMFORT AND PROTECTION

More and more people are seeking to enhance the comfort and security of their homes. Berker is responding to those needs with an extensive range of controllers, presence detectors and intelligent control components.

For example, the Berker Control digital monitor provides reliable all-round sensing because its sharp eye misses nothing. If it detects a movement within its field, it automatically switches the lights on. It lights the way for welcome guests and deters the uninvited.

SLEEP WELL

Around 70% of all deaths in fires occur at night. The reason for this is that the most frequent cause of death is smoke inhalation since the sense of smell is 'switched off' when we sleep. Toxic smoke gases therefore go undetected. The Berker smoke detector RM.1 is our way of lending you a bit more security. It operates on the basis of the optical function principle and offers early, reliable fire detection. When it has detected a fire it wakes you with a penetrating alarm of more than 85 dB(A)/3 m. The optional radio module allows you to network several smoke alarms together with no cabling. The smoke detector can then sound an alarm in the bedroom even while the fire is still in the basement. You see, the Berker smoke detector RM.1 is for you – sleep well.

RUGGED AND SAFE

Arsys IP 44

Berker ISO-Panzer  
rotary switch

Berker Aquatec  
push-button

Berker splash-proof  
flush-mounted switch

Berker also offers an extensive range of reliable, robust and attractive ranges with water-resisting characteristics. The range is designed to meet any and all requirements from the standard flush-mounted range through the water-resistant versions of the Arsys flush-mounted area range in stainless steel to the surface-mounted Aquatec range or the tough, impervious ISO-Panzer equipment.
